

# SEE & BE SEEN

**Look Left**

**Look Right**

**Look Left AGAIN**

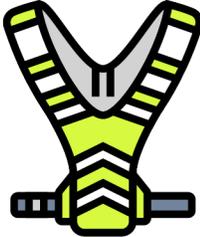

Before crossing the street, stop and look to the left, then right, and then left again.

The final look to the left is extra important - that's the direction cars will reach you first, and they come faster than you think!

Cross only when the walk signal is on and still look both ways!

If there is no signal, follow the crossing guard or traffic signs.

Wearing reflective gear helps drivers see you more easily when it is dark outside, whether you are walking or biking.

This gives drivers more time to slow down and keep everyone safe!

Take off your headphones and put your phone away while walking and biking.

Use all your senses to stay alert and aware of your surroundings!

**How else can you make sure you're seeing and being seen by drivers?**
