

SIGNAL FOR SAFETY

Hand signals are like using turn signals in a car - it shows others what you are about to do! Here are 3 hand signals everyone should know:

← Turning Left

Stick your left arm straight out to the side. This tells drivers and other bikers you are turning **LEFT.**

Stop ●

Hold your left arm out and bend your elbow like an upside down “L”. This lets others know you’re **STOPPING.**

Turning Right →

Stick your right arm straight out to the side. This lets others know you are turning **RIGHT.**
